REALTIME vs RADIO FREQUENCY (RF) BASED DEVICES*

	REALTIME	RF DEVICE
Technology	GPS based security & locating device. Designed to offer total vehicle management.	Radio frequency communication designed specifically to locate stolen vehicles.
Coverage	Complete nationwide coverage; needs line of sight to satellites.	Limited coverage; can be tracked inside of completely enclosed areas.
Integration with Law Enforcement	Customer provides detailed tracking information directly to law enforcement; no special equipment for police needed.	Relies on accuracy, reliability of a radio signal that will be tracked by police. Special police equipment is required.
